

SPOT WELD SERIES

Features:

- **DN-Series Spot Weld**
- **The DN-Series** spot welder is a foot start type. It is mainly use to spot-weld low carbon steel plates and weld two plate materials or line materials You can also weld more than pieces of non ferrous metal and alloy
- Come with single phases and three phases
- It is particularly suitable for training centers and industrial equipment

KUMAI Specialties:

- Come with 1 year full warranty from manufacturer

3 Phases CC Welder

Model	Rated power (kVA)	Input Voltage (v)	Second empty load voltage	Second adjustable class number	Rated duty cycle (%)	Max welding thickness of low carbon steel (mm)	Max welding diameter (Ø) of low carbon steel bar (mm)	Distance of electrode arm (mm)	Moving distance of up electrode (mm)	Welding production rate (mm)	Cooling water consumption (liter/hours)	Weight (kg)
DN-5	5	240V/ 1Ph	1.09~1.8	6	20	0.2+0.2 ~ 1.8+1.8	4+4	160	20	025000	80	60
DN-16	16	415V/ 3Ph	1.6~3.2	6	20	0.5+0.5 ~ 0.3+3	6+6	200	20	250	120	100
DN-25	25	415V/ 3Ph	1.76~3.52	8	20	0.8+0.8 ~ 4+4	8+8	200	20	250	250	120

Your Reliable Alternative
